Kami beritahukan bahwa LP2M Universitas Negeri Malang (UM) akan menyelenggarakan **Penataran-Lokakarya Nasional Pengelolaan dan Penyuntingan Jurnal Ilmiah**, pada hari Rabu, 6 September 2016 s.d. Sabtu, 9 September 2017 di Klub Bunga Butik Resort, Batu, Jawa Timur (brosur terlampir).

Mengingat pentingnya kegiatan tersebut, terutama untuk usulan akreditasi Berkala Ilmiah tahun 2018, yang menggunakan Pedoman Akreditasi Terbitan Berkala Ilmiah Tahun 2014, dimana hanya Berkala Ilmiah yang sudah *online* yang akan dinilai akreditasinya, kami mohon Saudara berkenan mempertimbangkan keikutsertaan Staf Saudara dan/atau menyebarluaskan brosur terlampir kepada para pengelola Berkala Ilmiah di lembaga Saudara.

Untuk mendapatkan informasi lebih lanjut, Saudara dapat menghubungi sekretariat panitia melalui Sdri. Retno, telepon/SMS/WA 085785296599 atau *e-mail* jurnalilmupendidikan@gmail.com.

Atas perhatian dan kerjasama yang baik, kami sampaikan terima kasih.

Ketua,

Prof. Dr. Suyono, M.Pd

1. The first part of the paper is devoted to a discussion of the general properties of the system under consideration. It is shown that the system is stable and that the energy is bounded from below. The ground state energy is found to be negative, which indicates that the system is bound.

2. In the second part, the properties of the excited states are investigated. It is shown that the system has a discrete spectrum of energy levels. The spacing between the levels is found to be independent of the system size, which is a characteristic feature of a system with a finite number of degrees of freedom.

3. The third part of the paper is devoted to a discussion of the asymptotic behavior of the system in the limit of large system size. It is shown that the system behaves like a free particle in this limit, with a dispersion relation that is linear in the system size.

4. The fourth part of the paper is devoted to a discussion of the properties of the system in the limit of small system size. It is shown that the system behaves like a harmonic oscillator in this limit, with a dispersion relation that is quadratic in the system size.
